Professional Summary

Full Stack Engineer with 1.5+ years of experience engineering scalable backend services, real-time architectures, and production-grade web applications. Expert in the MERN stack, Next.js, TypeScript, and NestJS — with a strong track record delivering optimized databases (MongoDB, PostgreSQL, Redis), containerized deployments with Docker on GCP, and enterprise integrations including LangChain, Stripe, WebSockets, and JWT/RBAC security systems.

Professional Experience

Full Stack Engineer | Monkhub Innovations | Gurgaon, India Aug 2025 – Present

- Architected secure backend services and full-stack features across 3+ core products (MNEE, MOST, Creaxor) using Next.js, React.js, and Node.js with server-side rendering and JWT/RBAC security
- Established modular NestJS microservices and accelerated high-frequency API throughput using Redis caching, ensuring reliable data synchronization across user sessions
- Provisioned scalable infrastructure using Docker, GitHub Actions CI/CD pipelines, and Google Cloud Platform (GCP) to streamline end-to-end feature delivery

Full Stack Developer | Code B Solutions Pvt. Ltd. | Mumbai, India Sep 2024 – May 2025

- Led full-stack development of a media streaming platform shipped across 1,000+ transit vehicles using React.js, Node.js, Docker, and GCP
- Engineered a custom Node.js and FFmpeg pipeline processing live video streams, scaling concurrent high-throughput media using child processes
- Spearheaded operational React.js admin panels serving 1,000+ concurrent users, utilizing Socket.io for live telemetry and vehicle logistics data
- Streamlined database performance by 45% through advanced MongoDB aggregation pipelines and indexing, ensuring 99.9% application uptime

Technical Projects

MOST – Hospitality and Travel Platform — AI-powered travel recommendation engine and hospitality platform

Tech Stack: NestJS · Stripe · Redis · LangChain · OpenAI · AWS · TypeScript

- Architected modular NestJS microservices for scalable AI travel workflows, integrating LangChain and OpenAI to power a recommendation engine improving response times by 35%
- Implemented Stripe payment processing, Redis caching for high-frequency data reads, and automated AWS S3/SES/SNS transactional pipelines via GitHub Actions CI/CD

DMS — Device Management System — Scaled high-concurrency streaming service handling 2500+ live cameras across 1000+ transit buses

Tech Stack: React.js · Node.js · Redux · GCP · Docker · ffmpeg · MongoDB

- Built a full-stack streaming system handling 2,500+ live cameras across 1,000+ transit buses by reverse-engineering proprietary network protocols
- Developed a React.js dashboard enabling administrators to monitor live video feeds, device health, and network telemetry in real-time

RolDrive — Ride Booking Platform [GitHub](#) — Full-stack ride-booking app with admin dashboard and real-time tracking

Tech Stack: React.js · Node.js · MongoDB · Socket.io · TypeScript · Redux

- Developed a real-time ride dispatch system using React.js and Node.js, building booking workflows and comprehensive administrative dashboards
- Integrated Socket.io and Redux to synchronize real-time location data seamlessly between driver applications and admin portals
- Implemented secure REST APIs with JWT authentication and RBAC, tuning database queries to significantly reduce driver-matching delays

Education

National Institute of Technology, Warangal

M.Sc. Mathematics & Scientific Computing

2022 – 2024

CGPA: 8.0/10.0

Deshbandhu College, University of Delhi

B.Sc. (Hons.) Mathematics

2019 – 2022

CGPA: 9.0/10.0

Technical Skills

Languages: JavaScript (ES6+), TypeScript, C++, SQL

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, REST APIs, Socket.io, WebSockets, JWT, RBAC

Databases: PostgreSQL, MongoDB, Redis, MySQL

Cloud & DevOps: Docker, GCP, AWS (S3, SES, SNS), GitHub Actions, CI/CD

Achievements

- **Competitive Programming** [Link](#) : Top 100 Institute Rank on GeeksforGeeks with 534+ problems solved
- **LeetCode** [Link](#) : 400+ Data Structures & Algorithms problems across all difficulty levels
- **JAM 2022**: All India Rank 317 in Joint Admission Test for M.Sc. Mathematics (15,000+ candidates)
